

JOB TITLE	INDUSTRIAL ENGINEER
Level of Authority	Management
Job No.	A011
Reports to	Chief Operating Officer
Subordinate	
Contacts	Suppliers, Contractors, Advisors
Status	CONTRACT

PRINCIPAL PURPOSE OF JOB/ JOB SUMMARY:

The incumbent is required to ensure that all components of the manufacturing process, from supply chain to assembly line operations and beyond, are best optimized for maximum productivity, quality, and efficiency.

The Industrial Engineer will find ways to prevent waste and inefficiency in production processes. He/she will design efficient systems that integrate workers, information, machines, energy and materials to make products or provide services. The incumbent will also design equipment to coordinate production planning to minimize production issues and costs while ensuring products meet quality standards. He/she will design, develop and maintain manufacturing routes to maximize effectiveness, efficiency and space. The Industrial Engineer will also make sure the company complies with all industry standards for safety while meeting design standards and guidelines. He/she will also work in a support role for the COO as needed on less complex projects.

EDUCATION AND EXPERIENCE REQUIREMENT

- Minimum 1st Degree in Industrial Engineering or Logistics
- Minimum of 2 years' experience in a similar capacity
- Proficiency in Microsoft Excel, Word, Power Point
- Proficient in Microsoft Excel and Word
- He/She must keep abreast of new technology that can be used in the manufacturing processes.
